EXPERIENCE

Meatplus Trading Corp.

Nov 2025 - Present

Backend Software Developer (Full-Stack Responsibilities) | United Nation, Manila

- Co-develop internal systems used across production, warehouse, purchasing, and finance operations.
- Build backend and frontend features using Laravel/PHP, MySQL/MariaDB, JavaScript, Blade, Tailwind CSS, and Alpine.js, including backend logic, database operations, validation, and user interfaces.
- Work with another developer on feature delivery, debugging, testing, reporting, document generation, data import/export, and role-based access.

moodLearning, Inc.

Feb 2025 - May 2025

IT Intern - Web Developer | UP Diliman, Quezon City

- Built responsive React.js and Ionic interfaces and helped with testing, debugging, and deployment.

PROJECTS

PMAI Warehouse System | Meatplus Trading Corp.

- Contributed to an internal production and warehouse system that tracks products from weighing through warehouse receiving, storage, processing, stock movement, and dispatch using QR-coded crates.
- Worked on production weighing, QR labels, receiving, pallet and warehouse features, stock and production reports, CSV export, user roles, and module permissions.

Technologies: PHP, Laravel, MySQL/MariaDB, Blade, Tailwind CSS, Alpine.js, JavaScript, Git

SOPD - Purchasing & Accounts Payable System | Meatplus Trading Corp.

- Contributed to an internal purchasing and finance system covering sales order, deliveries, purchase requests, purchase orders, receiving and approval, AP invoices, requests for payment, and check vouchers.
- Worked mainly on finance features, reports, imports, permissions, backend/database work, validation, and document generation.

Technologies: PHP, Laravel, MySQL, JavaScript, Bootstrap, Tailwind CSS, AdminLTE, Git
